Forecast for Tuesday 09 May 2023

Weather: Cloudy initially, mainly across the west of the Park, with some patchy early rain or drizzle. Brightening up by mid-morning to sunny spells. Well-scattered showers developing from mid-morning. Showers will become more frequent and slow-moving this afternoon, locally heavy, with the risk of thunder and hail. Any showers will gradually decay and fade by early evening, with some clear spells developing.

Chance of cloud-free hill tops above 600m: 40% in the west at first. Generally 80% otherwise with deteriorations in heavy showers.

Low cloud and visibility: Areas of low cloud, with bases down to 400-500m, may affect westernmost slopes at first. Cloud will lift and break to above the summits from mid-morning. Poor or very poor visibility in any early mist or showers, becoming mostly good or very good. Deteriorations to poor in heavy showers during the day, cloud may shroud tops in and around any heavy or persistent downpours, lasting for several hours.

Meteorologist's View

Areas of low cloud and drizzle may make for challenging navigation at height during the morning. Care should be taken if heading out in the hills in the afternoon, with the chance of heavy and thundery downpours. Risk of hail and lightning. Strong UV levels in any spells of afternoon sunshine.

Recent rainfall: measured at Cat & Fiddle: altitude 511m

02:00 on Tue 09 May 2023	8mm	8.2mm	10.4mm

Forecast for Wednesday 10 May 2023

Weather: Largely dry at first. A band of showery rain is expected to move eastwards Wednesday morning, with lowest cloud affecting western upslopes. Brightening up by late-morning to sunny spells and scattered showers. Showers may be locally heavy, with the risk of hail and thunder in places. Any showers slowly fading into the evening to leave largely dry conditions and clear spells. An organised band of further showery rain may arrive from the west by midnight.

Maximum wind: Westerly 15-20 mph, gusting 20-25 mph.

Chance of cloud-free hill tops above 600m: 30% at first, mainly for western hills. Otherwise generally 80%.

Low cloud and visibility: Areas of low cloud with bases around 400-500m early morning, lifting to above the summits by mid-morning. Poor or very poor visibility in early showery rain, becoming good during the day. Sharp deterioration in showers to moderate or poor. Cloud bases may shroud higher routes in and around heavier showers for a few hours.

Temperature: **Valleys:** Plus 6 Celsius, becoming Plus 17 Celsius.
At 600m: Plus 6 Celsius, becoming Plus 10 Celsius
Freezing level: Above the summits.
